

Case study: Beverage Bottling Industry

TOMBO™ No. 9014 SaniClean™ Gasket

Industry

Food & beverage industry

Customer

Bottling subsidiary of a world leading beverage company

Background

The customer produces a variety of drinks with a wide variety of flavours on the same production line. It was noticed that gaskets used in the production line were undergoing surface degradation and peel-off due to the repeated use of hot water, hot caustic liquid and chlorine water during the necessary sanitation processes deployed, which in turn resulted in lower sealing performance of the gasket, flavour/odour contamination and lower productivity.

Challenges faced

The customer noticed a gradual decline in productivity. One of the reasons was the long sanitation times between product runs, which consisted of multiple cycles of cleaning taking approximately 1.5 hours to complete. In turn, the sanitation process caused deterioration of gasket materials – with the weakened gasket causing flavour/odour contamination between pungent and non-pungent products. The customer was searching for a new gasket that would withstand their rigorous sanitation process with many SIP/CIP cycles, prevent contamination and increase productivity.

Solution and benefits

To overcome the production challenges faced, NICHIAS SaniClean™ Gasket was chosen. With a NICHIAS original EPDM rubber core grafted with PTFE for protection of its intended contact surface, NICHIAS Sani-

Clean™ gasket maintains the high-flexibility of rubber whilst delivering strong chemical and heat resistance in use. It can withstand multiple sanitation processes without degradation due to the protective PTFE layer on all surfaces that come into contact with liquids.

In a test trial, NICHIAS SaniClean™ passed the customer's strict flavour contamination tests measured by microorganism growth with high sanitation quality levels achieved. Furthermore, sanitation downtime was reduced by 44% by being able to omit 3 steps in the sanitation process. With the use of NICHIAS SaniClean™ the customer is now able to execute quick sanitation processes, increase productivity and run the bottling process without concerns of flavour/odour contamination.

⚠ Cautions

- The products included in this catalog are intended for common use, including those presented in the catalog. If you intend to use any of the products in a way that requires extremely high quality and reliability such that any possible defect may directly affect the safety of human lives, please make sure to consult with our company in advance and take necessary measures at your responsibility.
- Because the stated material values may vary according to actual usage environments or circumstances, please consider such figures as indications for reference.
- The content of the catalog explains the features of the products when they are used alone. When actually using the products, please start using them after testing them under the actual usage environment.
- The content of the explanation of the products may be modified without any advance notice, and the production of the product may also be discontinued without advance notice. Please obtain the latest version of the catalog, and confirm the content thereof. The date of issuance of this catalog is printed on this page.
- The standards, accreditation and provisions of laws included in the catalog may not conform with the latest version thereof.
- We strictly prohibit any acts of infringement upon our rights that are protected by the Copyright Act with regard to information included in the catalog, through the production of copies or imitations, misappropriation or unauthorized reprinting.
- Please be informed that, in the case where any problem involving a third party's industrial property right arises due to the use of any product included in the catalog, our company shall not be responsible for any problems other than the problems arising strictly due to reasons related to only such products.
- Please be aware that our company will not bear any responsibility for the following damage related to our products:
 - Damage arising due to natural disasters or accidents occurring for reasons that are not attributable to our company;
 - Damage arising due to remodeling, repairing or other acts by a third party;
 - Damage arising due to the willful intent or negligence of the customer or the user, or due to the improper use or use under abnormal conditions of the products;
 - Damage arising due to the failure to carry out regular checkups and appropriate repairs, maintenance and part replacements, considering various conditions, such as the usage conditions, usage environment and usage period, etc., of the product;
 - Indirect damage (including any operational damage, lost profits, opportunity losses, etc.) arising due to the use of or inability to use our company's product;
 - Damage arising due to a situation which was unforeseeable under the technical standards at the time of the shipment of our company's product; or
 - Damage arising due to reasons that are not attributable to our company.
